---

PROFILE

Versatile content writer and copywriter with hands-on experience in blog writing, social media copy, technical writing, and sports betting content, alongside independent experience designing and building full web products end-to-end — entirely from a mobile device, with no dedicated computer. Has shipped a Progressive Web App (PWA) SaaS form builder with live paid subscriptions and a national distress-response civic portal now in active use by an NGO, using Supabase, Netlify, and standard billing. Founder of Zero Coin India, a forensic audit consultancy helping Indian crypto investors with VDA tax compliance. Currently pursuing a BA in English Literature at Kalyani University.

INDEPENDENTLY BUILT PRODUCTS

FromCraft Pro — Progressive Web App (PWA) SaaS form builder

fromcraft.netlify.app

- Designed and built a drag-and-drop form builder with response collection, CSV export, and an analytics dashboard, architected as an installable progressive web app on a Supabase backend.
- Implemented a Free/Pro subscription model with a live billing flow, account management, and password recovery.
- Shipped white-label branding for Pro users, including automatic accent-color extraction from an uploaded logo, and resolved cross-device bugs including mobile billing redirects.

Sahayata Portal — National distress-response civic platform — donated to an NGO

sahayata-portal.netlify.app

- Built a confidential crisis-reporting portal for citizens covering harassment, workplace abuse, and family distress, with severity triage and a trackable Case ID system.
- Designed a dedicated Emergency Help flow that routes high-risk cases into a crisis queue for human counselor review, plus an authority dashboard with case analytics.
- Added a self-care "Calm Space" (guided breathing, grounding exercises, private journal) and full bilingual Hindi/English support across the application.
- Delivered the finished product to a nonprofit organization for real-world deployment.

FREELANCE CONTENT WRITING & COPYWRITING

Self-Employed — 2024 – Present

- Write beginner-friendly guides and platform reviews (e.g. Dream11, Bet365) that explain sports betting fundamentals in plain, jargon-free language for Indian audiences.
- Created a spec copywriting campaign for Gen Z fashion brand "Slayy," including Instagram ad captions, product descriptions, and brand taglines tuned to an internet-native tone.
- Produce long-form blog content and content strategy plans on student focus, mental health, and ADHD awareness for a 15-22 age readership, including platform strategy and content calendars.
- Authored and published digital products: a book on Amazon India, a workflow-automation guide, an invoice template, and an AI documentation tool — all independently researched and marketed.

FOUNDER & FORENSIC AUDIT LEAD

Zero Coin India — April 2026 – Present

- • Founded a consultancy providing Signed Technical Audit Certificates and VDA gain/loss calculations for Indian crypto investors filing under Section 115BBH.
- • Conducts forensic validation of blockchain transaction data to protect clients from tax notices and legal exposure.
- • Built automated workflows with Google Apps Script to make forensic auditing affordable for retail investors.

EDUCATION

Bachelor of Arts — English Literature

Kalyani University — In progress

- • Developing strong critical thinking, research, and analytical writing capabilities, applied directly to structuring product copy, documentation, and audience-facing content.

SKILLS

Product & Technical: SQL, PostgreSQL, Supabase (Auth, Postgres, RLS, Storage, Edge Functions), Netlify deployment, UPI payment integration, Google Apps Script automation, progressive web app (PWA) architecture, single-file app architecture, mobile-only build workflow, React / TypeScript / Vite basics

AI-Assisted Tools: Claude, ChatGPT, Gemini — used for code generation, debugging, content drafting, and workflow automation across all independently built products

Content & Strategy: Blog & article writing, social media copywriting, technical writing, content strategy & calendars, brand tone creation, audience research, copy editing & proofreading, Google Workspace, Microsoft Office
